compnay Anatomagy Inc., USA

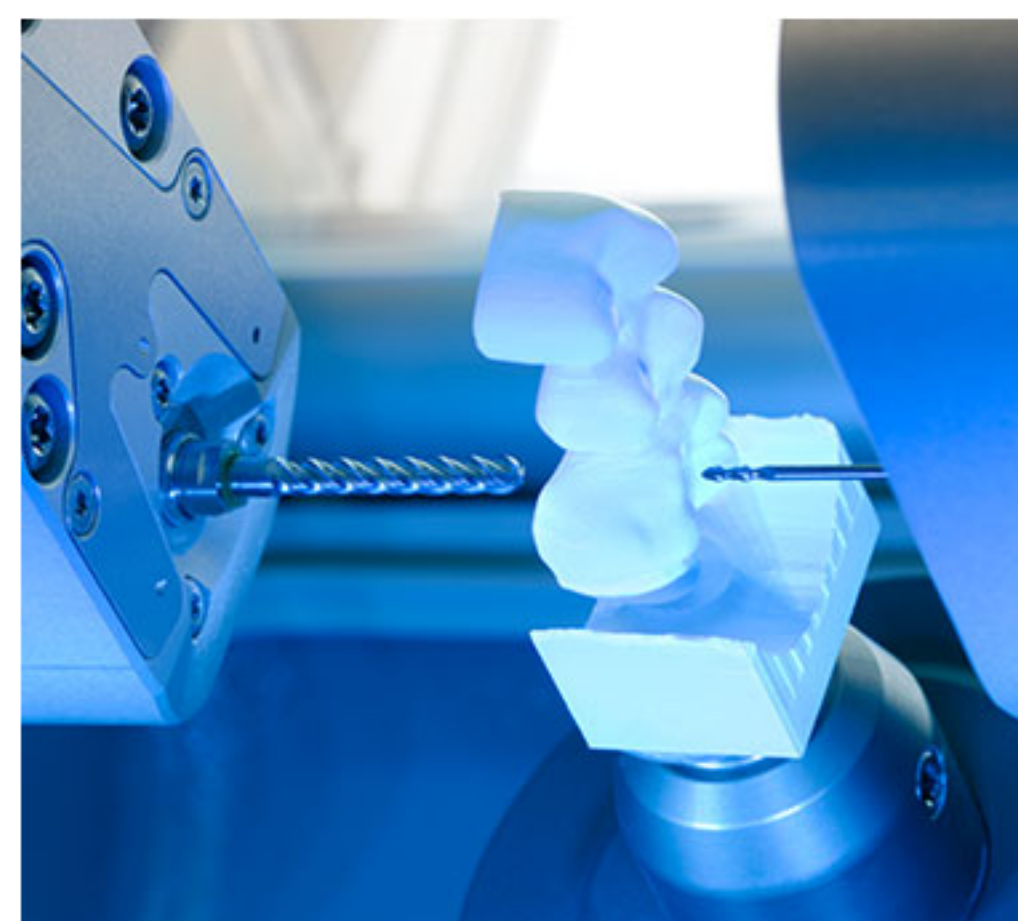

[3D Simulation]
system for safe and
quick operation without failure

One-day
3D Precision Diagnosis

1-to-1 team based system
from diagnosis to surgery
at the same day

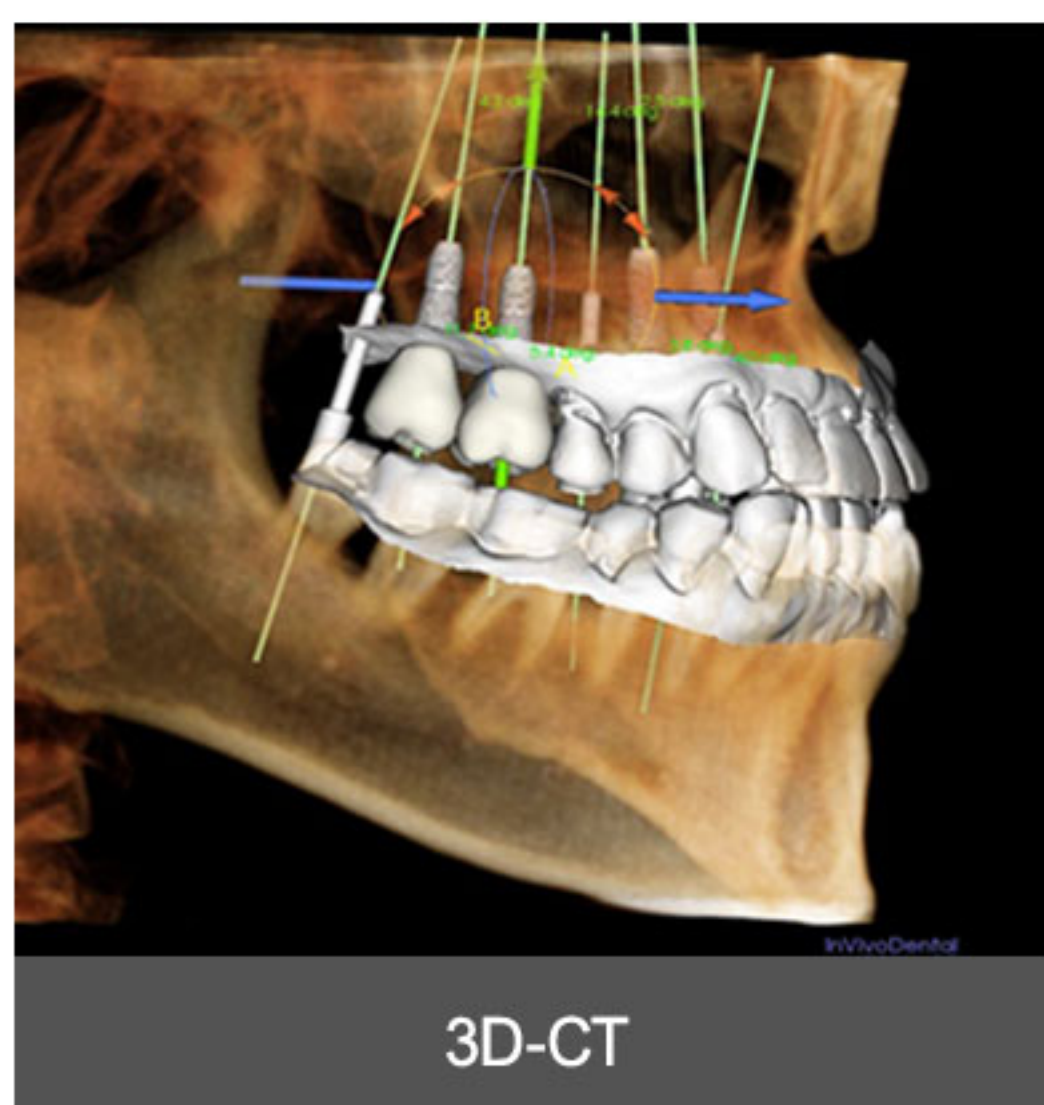

CEREC machine for
1 day prosthetic treatment
and own dental laboratory

The best choice for your bright smile

Precision diagnosis that takes at least 2 days in a large general hospital But, it is possible only in 1 day at the dentistry specialized, **S-PLANT Dental Hospital**

S-PLANT Dental Hospital, the digital dentistry specialized hospital, completes the precision diagnosis within the minimum time Which includes all the procedures including X-ray, 3D-CT and diagnosis.

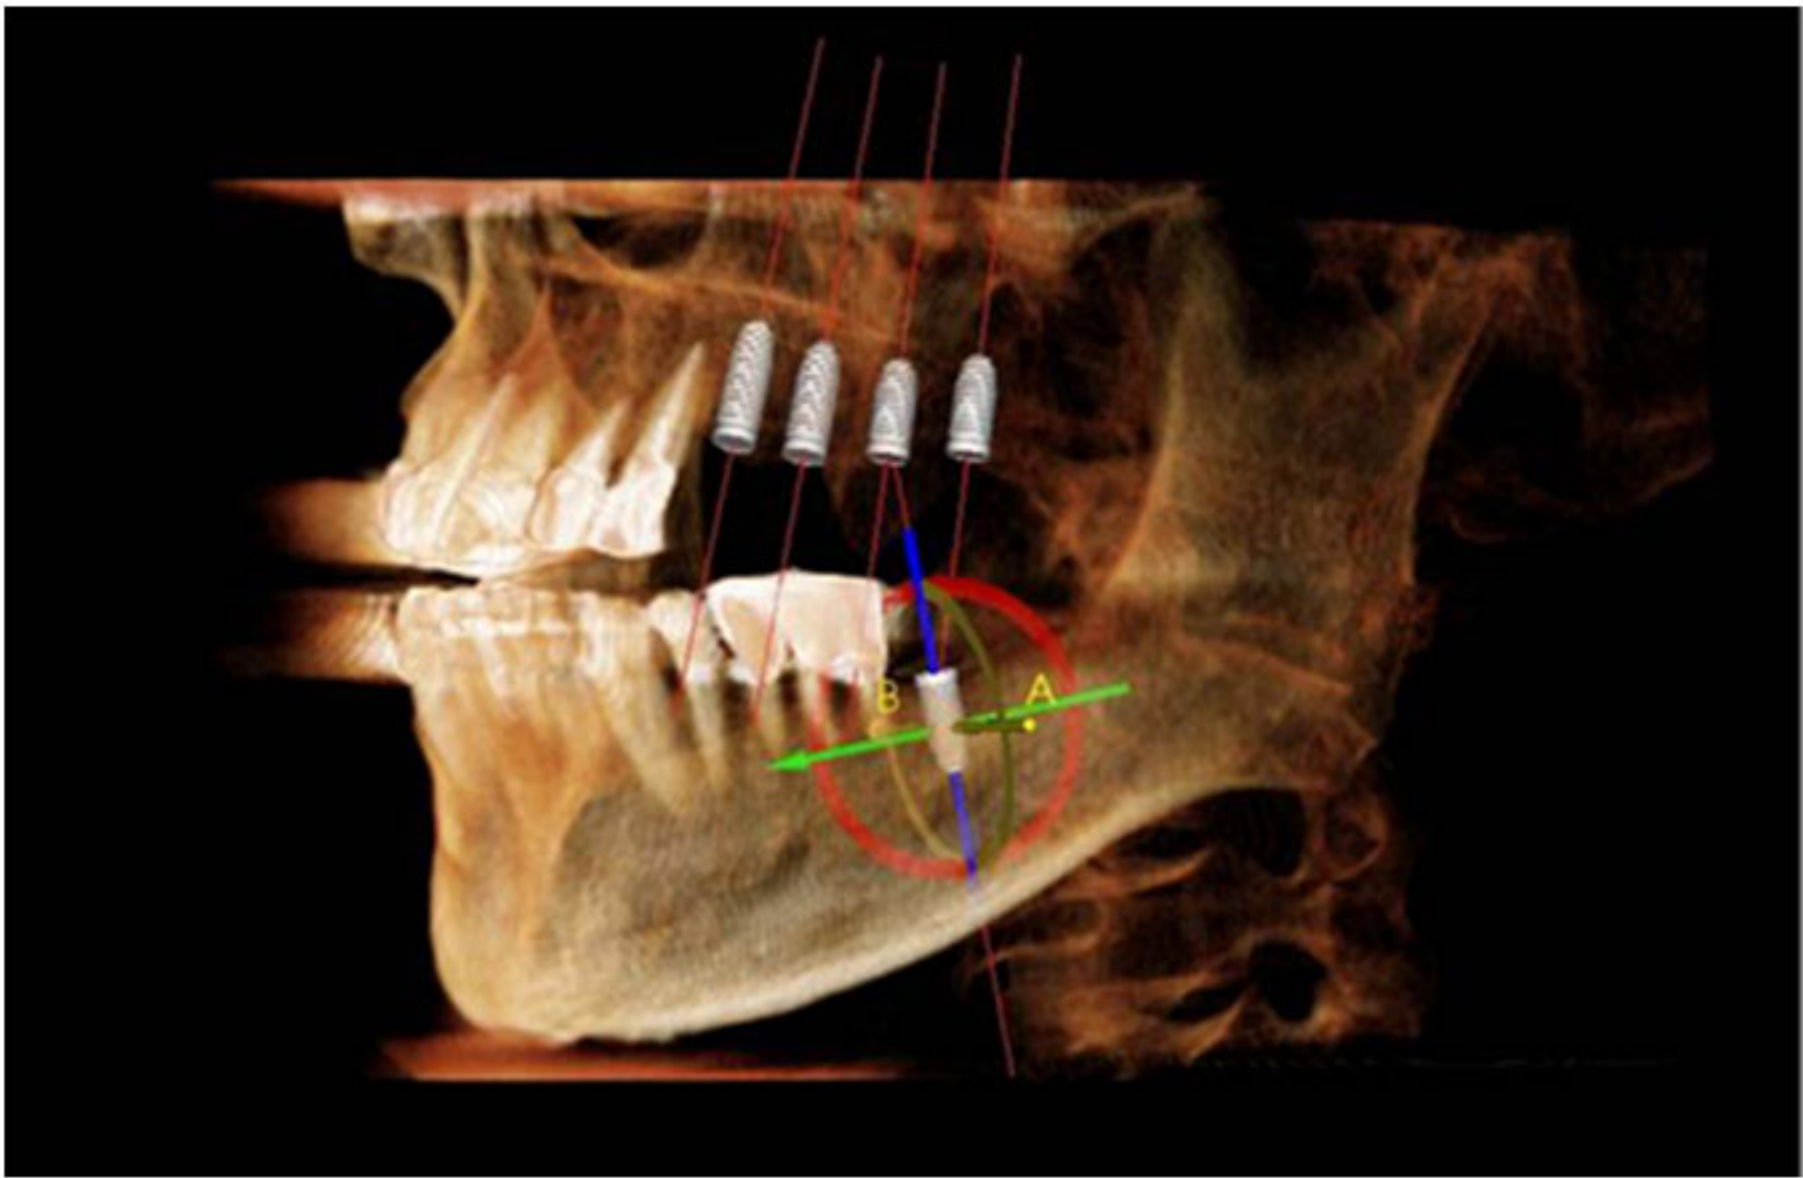

Visiting on a tight schedule?

Customized treatment system tailored to patient schedule

- ✓ 1:1 treatment as a team
- ✓ 1:1 schedule management from examination and consultation to operation
- ✓ With its own laboratory and Cerec machine, all prosthetic treatment can be done quickly without a problem

■ Difficult dental implant surgery,
[Virtual Surgery Simulation] is important
to prevent the failure.

[Virtual Surgery Simulation]
As my teeth condition is proceeding
as it is in practice.

Based on the patient's CT images, we provide patient-customized surgery that optimizes the operation plan by performing the implant simulation on the computer several times.

■ Features of S-PLANT Dental Implant!
Completing all treatments with minimum visits!

《One-day Dental Implant》 ※ It depends on the patient's dental condition.
From examination to surgery ends on the day of visit

	Extraction	Gum Recovery	Dental Implant Placement	Temporary	Final Crown
General Dental Implant					
One-day Dental Implant	Extraction Dental Implant Placement Temporary Crown Final Crown				

<Benefits of One-day Dental Implant>

- ✓ **Less worry about infection**
The probability of infection is less since it would proceed with the minimum incision in less time.
- ✓ **Less discomforts according to tooth loss**
The discomfort according to tooth loss would decrease during the progress of the dental implant since it would complete on the same day.
- ✓ **Rapid recovery**
Minimal incision reduces bleeding and swelling, and would healing is faster

Dental treatment, it would be painless.

[Conscious sedation therapy] for painless treatment

It is a way to relax the patient so that the patient can be treated in a relaxed state and then proceed with the treatment. As you are in sleep, you do not remember the situation. Therefore you can be treated comfortably without fear and tension in dental treatment.

We recommend for those

- Who have dental phobia
- Who can not afford surgery time such as elderly patients
- Who need multiple implants placed at once or require long-term surgery with complicated bone grafts
- Who are expected to get stress of the treatment itself due to their hypertension and general disease
- Who find the dental treatment difficult due to serious vomiting

We pursue comfortable treatment through various care

[Therapy] For the state of balance

The professional therapist uses various therapy programs to help **relax, relieve pain, and prompt recovery** before and after surgery or treatment.

Aromatherapy

It is a therapy that stabilizes the body and mind with aroma fragrance.

Stonetherapy

It is a replacement therapy which makes body calm comfortably by using the warm stone and improves the flow of lymph.

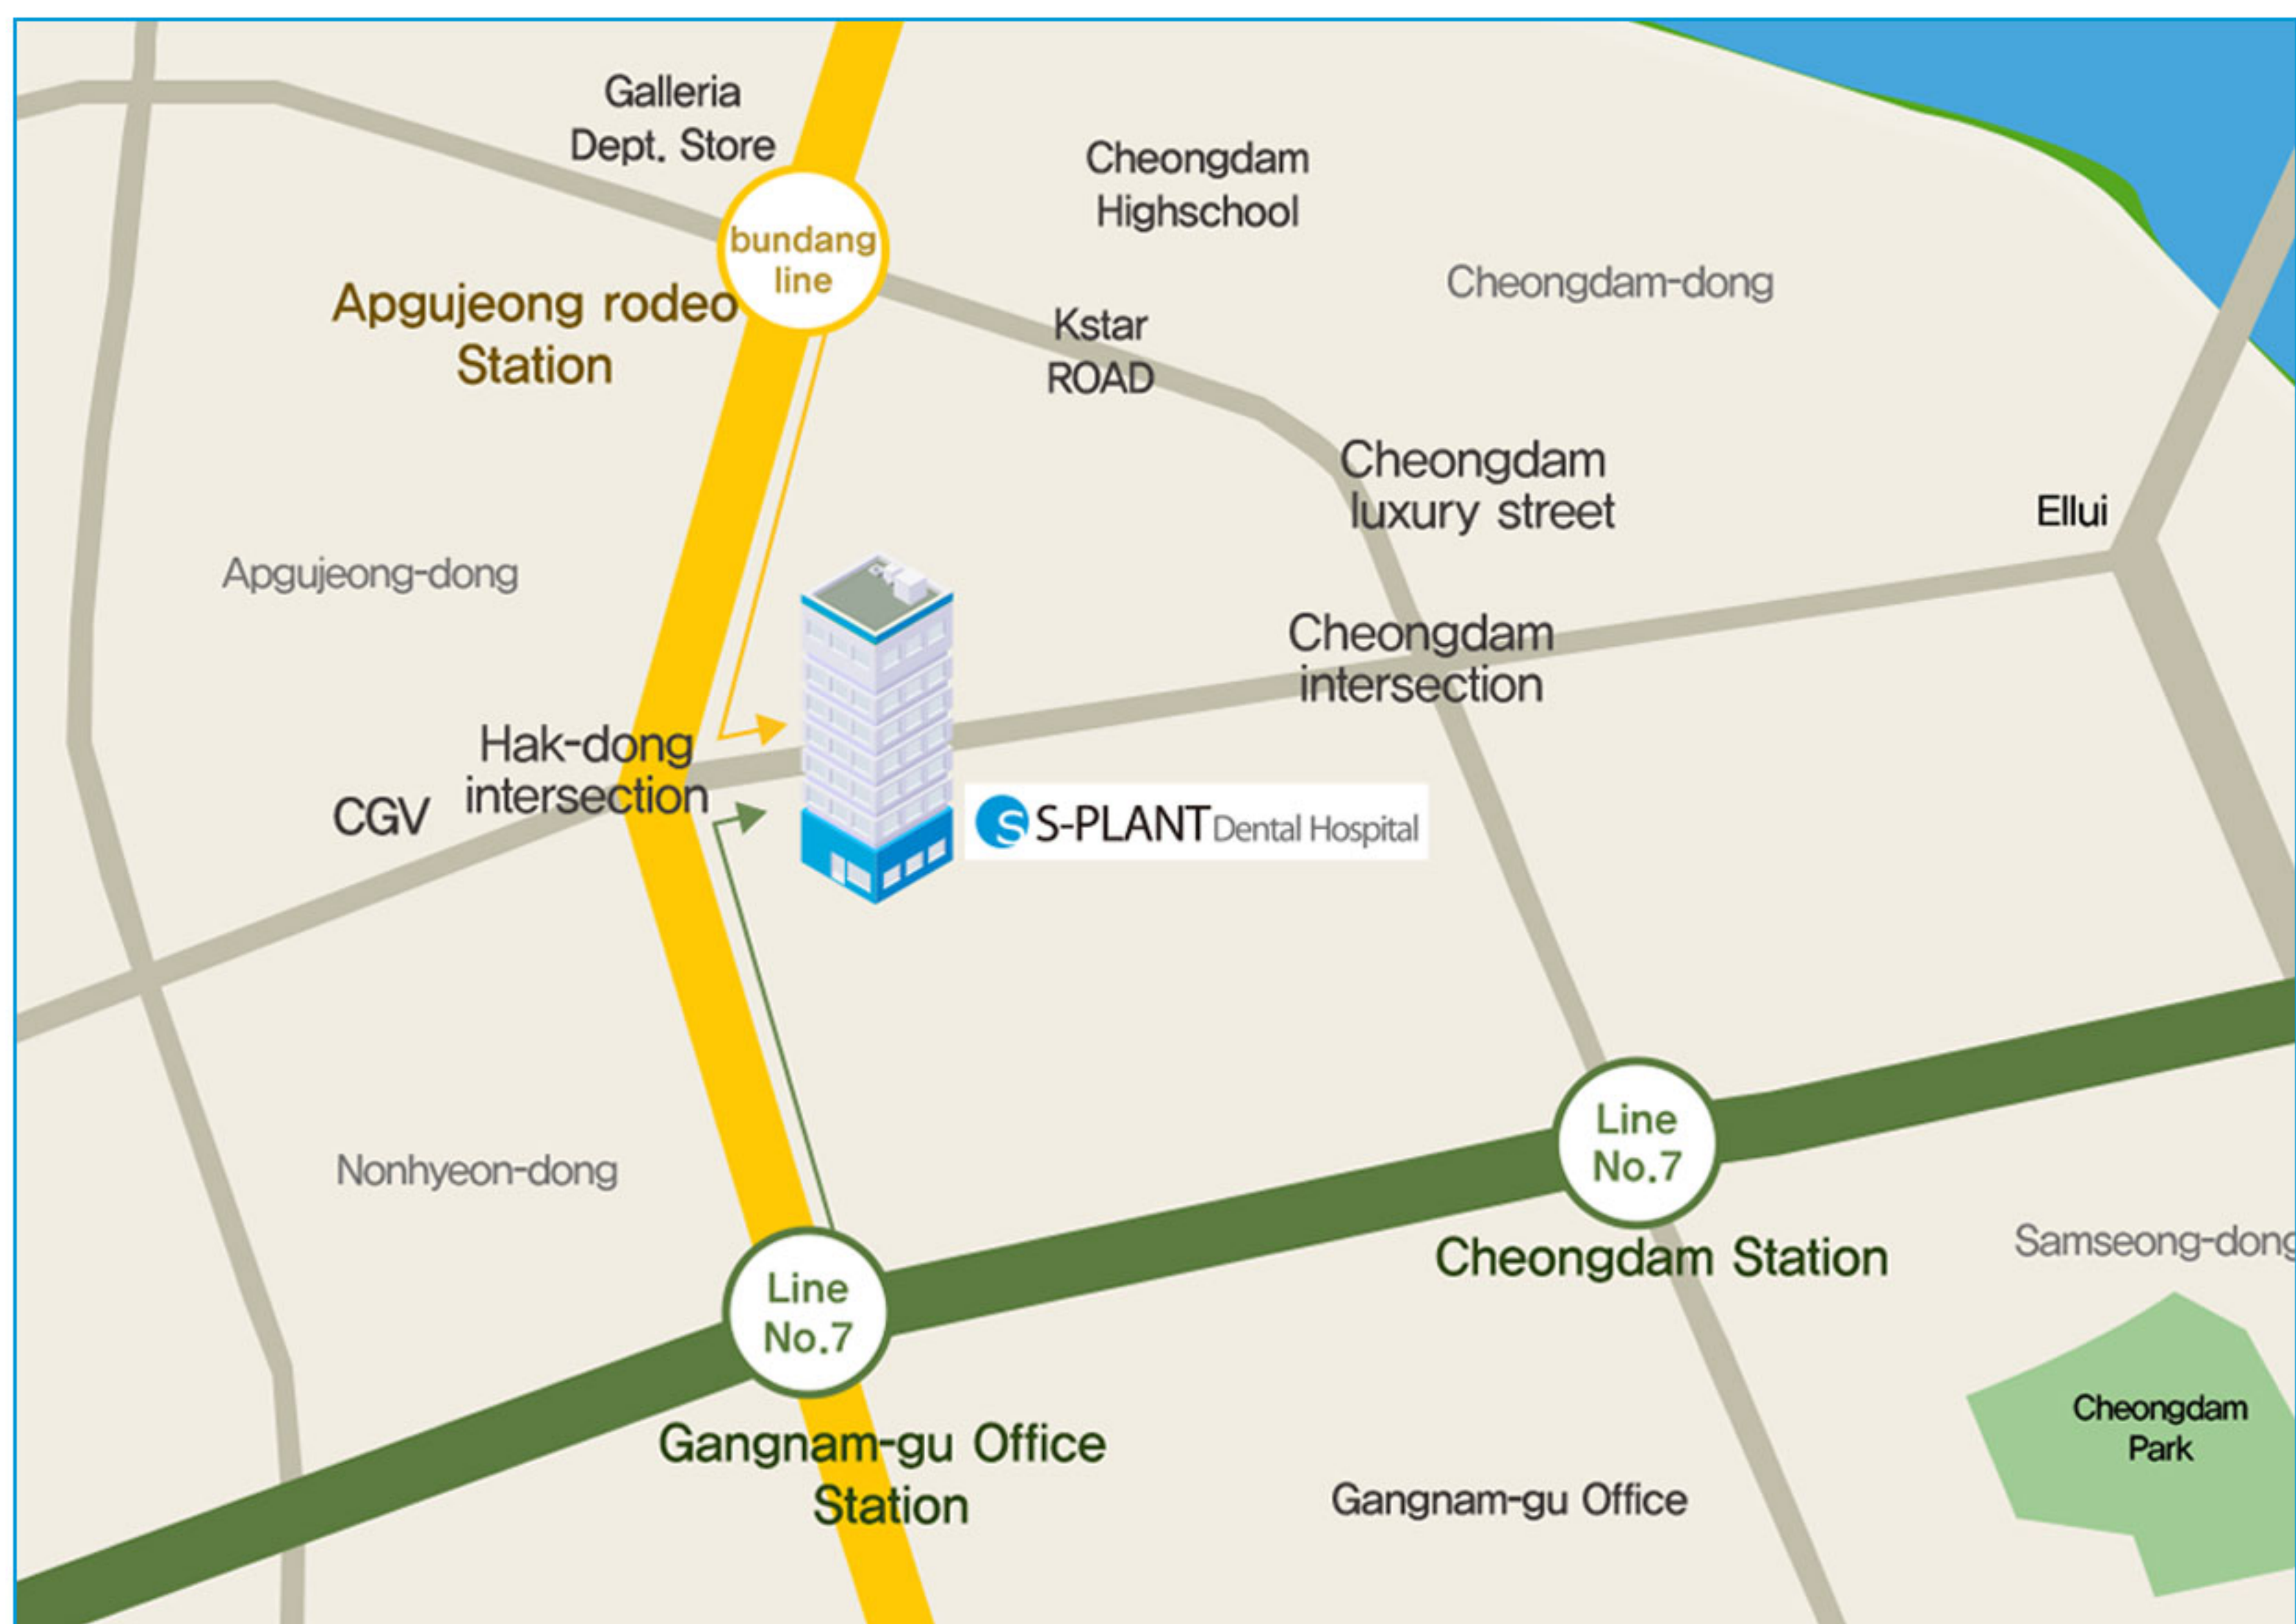

Musictherapy

It is a therapy that induces emotional stable response such as blood pressure, heart beat and brain wave etc by using the rhythm of music.

Location

Airport 6006 Incheon International Airport 11A → Apgujeong rodeo Station
